Bothell, WA

Summary

Skilled Software Engineer with experience developing cloud infrastructure using AWS/Terraform, along with developing applications in Spring, React, and Webpack. Proficient in multiple programming languages, including Java, JavaScript, Python, and C#. Adept at developing backend infrastructure, integrating secure authentication, and contributing to content management systems. Looking to leverage my skills to contribute to innovative projects and integrate myself into a robust team where I can learn from my peers and continue my journey as a Software Engineer.

Work Experience

Software Engineer II

Sinclair Broadcast Group, Seattle, WA

August 2023 - June 2024

- Helped designed and developed an interactive ATSC 3.0 broadcast applications with React, Node.js, and Canvas. Allowing us to create an immersive and engaging expertise to spearhead enterprise broadcast applications
- Built and maintained backend systems with Node.js and SQL/DynamoDB powered by AWS. Provisioned Infrastructure with Terraform and streamlined deployments through CI/CD pipelines for seamless deployments.
- Designed and deployed robust AWS Lambda functions that handle user traffic in tandem with the API Gateway.
- Collaborated in an Agile team to diagnose and resolve deep-rooted platform issues, enhancing stability and maintainability.

Software Engineer I

Sinclair Broadcast Group, Seattle, WA

March 2023 - August 2023

- Developed code for a Java Spring data migration service, automating the transfer of millions of SQL records from production to lower environments.
- Debugged and designed features inside of an Agile team to increase readability and sustainability of Sinclair's Storyline CMS using Java, Spring, and SQL. All while implementing and maintaining OOP best practices.

Software Developer

Tilosi, Bothell, WA

June 2024 - December 2025

- Worked with peers to built core simulation systems for Towns and Wilds using C#, .NET 5, WPF, and a 1024x1024 pixel canvas providing and immersive and engaging gameplay experience.
- Developed and maintained scalable C#/.NET microxwservices and RESTful API's handing persistent game updates and dynamic environment processes.
- Helped develop and Implement AI-driven zone systems with behavior trees, procedural generation, and dynamic environment mechanics.

Freight/Receiving Associate

The Home Depot, Bothell, WA

December 2025 - Present

- Load and unload trucks, move material from the receiving area throughout the store.

Skills

Programming

Java, JavaScript, Python, C#, SQL, NoSQL

Web Development

HTML, CSS, React, Node.js, Webpack GraphQL

Database Management

MySQL, MongoDB, DynamoDB

Version Control

Git, GitHub, GitLab

Cloud Architecture

CI/CD, Terraform, EC2(linux), ALB, Auto Scaling, S3+CloudFront, API GW, Lambda, Route 53

Debugging & Testing

Unit, Integration, Jest

Education

Full-Stack Development Certification

University of Washington, Seattle, WA

Computer Science

Washington State University, Pullman, WA

Computer Programming, Cloud Architecture

Self-Taught, Woodinville, WA

Honors

Letter of Recommendation

Sinclair Broadcast Group, Seattle, WA

Author: Chris Taylor, Senior Technical Director
