Bothell, WA

Summary

Skilled Software Engineer with experience developing cloud infrastructure using AWS/Terraform, along with developing applications in Spring, React, and Webpack. Proficient in multiple programming languages, including Java, JavaScript, Python, and C#. Adept at developing backend infrastructure, integrating secure authentication, and contributing to content management systems. Looking to leverage my skills to contribute to innovative projects within a dynamic company.

Work Experience

Freight/Receiving Associate

The Home Depot, Bothell, WA

December 2025 - Present

- Load and unload trucks, move material from the receiving area throughout the store.

Software Developer

Tilosi, Bothell, WA

June 2024 - December 2025

- Built core simulation systems for Towns and Wilds using C#, .NET 5, WPF, and a 1024x1024 pixel canvas.
- Implemented AI-driven zone systems with behavior trees, procedural generation, and dynamic environment mechanics.

Software Engineer II

Sinclair Broadcast Group, Seattle, WA

August 2023 - June 2024

- Designed and developed interactive ATSC 3.0 broadcast applications with React, Node.js, and Canvas.
- Optimized backend systems with Node.js and SQL/DynamoDB. Provisioned Infrastructure with Terraform and streamlined deployments through CI/CD pipelines.
- Designed and deployed robust AWS Lambda functions that handle user traffic in tandem with the API Gateway.
- Collaborated in an Agile team to diagnose and resolve deep-rooted platform issues, enhancing stability and maintainability.

Software Engineer I

Sinclair Broadcast Group, Seattle, WA

March 2023 - August 2023

- Developed code for a Java Spring data migration service, automating the transfer of millions of SQL records from production to QA/INT environments.
- Debugged and designed features within Sinclair's Storyline CMS using Java, Spring, and SQL. While implementing OOP best practices.

Skills

Programming

Java, JavaScript, Python, C#, SQL, NoSQL

Web Development

HTML, CSS, React, Node.js, Webpack

Database Management

MySQL, MongoDB, DynamoDB

Version Control

Git, GitHub, GitLab

Cloud Architecture

CI/CD, Terraform, EC2(linux), ALB, Auto Scaling, S3+CloudFront, API GW, Lambda, Route 53

Debugging & Testing

Unit, Integration

Education

Full-Stack Development Certification

University of Washington, Seattle, WA

August 2022 - March 2023

Full-Stack Development Certification

Washington State University, Pullman, WA

August 2021 - April 2022

Computer Programming, Cloud Architecture

Self-Taught, Woodinville, WA

June 2018 - August 2022

Honors

Letter of Recommendation

Sinclair Broadcast Group, Seattle, WA

Author: Chris Taylor, Senior Technical Director
