

Chris Taylor
Senior Technical Director
Sinclair Digital
140 4th Avenue North
Seattle, WA, 98109
June 2024

Dear Hiring Manager,

I am currently a Sr, Technical Director working inside the digital group at Sinclair Broadcasting, and I am also the founder and CEO of Kanoogi Inc., and formerly the Founder and CEO of Gas Powered Games.

It is my pleasure to write this letter of recommendation for Joseph Sanchez.

I have known Joseph for many years, and most recently invited him to join one of my development teams, working on a wide range of projects, first as an intern, and then as a full time contractor.

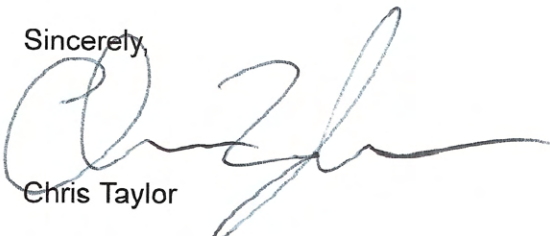

For more than a year, from March 2023 to June 2024, Joseph was able to quickly learn Java for a project involving a large experimental POC for a database ETL. He then developed a Chess game using HTML, Javascript and CSS, playable from inside a web browser, with the AI module hosted on AWS using a Lambda utilizing Node.js. He was also asked to learn how ATSC 3.0 standards work, so that he could get his chess game running on a commercial television using a standard television remote. Each of these was a uniquely complex problem, where patience, study and careful determination were needed.

Joseph is a very determined, self directed, and persistent engineer. He tackles new problems in areas where he has no prior experience, with tenacity and enthusiasm. This would often mean that he would need to do a lot of research and learning before he could move forward. This trait was evident when we first began talking about engineering years ago, as I coached him on a career of software development. I suggested he take a full stack course, and also work through an architect course on A Cloud Guru to learn AWS Cloud, both of which he did, with great success. He has also demonstrated that he is a strong team player, willing to work on whatever project he is assigned in close collaboration with others, or alone, whatever the project calls for.

As Joseph continues the practice of software engineering, I'm certain he will develop into a world class engineer and software architect. He has begun his professional journey on a very strong trajectory, which I will enjoy watching his success and taking pride in knowing that I was there at the start of his journey. I know Joseph will be a team player and a valuable part of any project he takes on or team he becomes a part of.

Any additional questions, you may reach me at chtaylor@sbgstv.com

Sincerely,

A handwritten signature in blue ink, appearing to read 'Chris Taylor', with a long horizontal flourish extending to the right.

Chris Taylor
